

Master Student Position in Immunology Research

We are seeking a highly motivated master student interested in immunology to join our team for a one-year research project.

Responsibilities:

- Perform bioinformatics analyses on single-cell flow cytometry and RNA sequencing data
- Develop and utilize scripts for data analysis
- Analyze patient cohorts and mouse experiments
- Investigate different immune populations and their association with outcomes, such as survival
- Participate in wet-lab experiments (human and mouse experiments, genotyping)

Qualifications:

- Strong interest in bioinformatics and computational biology
- Proficiency in R or Python
- Background in immunology, bioinformatics, or related field
- Experience with large-scale data analysis is a plus
- Experience with mouse and human samples or genotyping

This position offers the opportunity to gain valuable experience in cutting-edge immunology research. The candidate will work closely with our team of researchers and contribute to ongoing projects in the field.

To apply, please submit your CV, a brief statement of interest, and any relevant experience to kienzler@immunology.uzh.ch

We look forward to welcoming a new member to our research team!
